

De le Vin Designs

Lockshank™

**An elegant solution
for those rings you
can no longer wear
because of enlarged
knuckles**

A De le Vin Lockshank™ provides an efficient, durable solution to problems with enlarged knuckles:

- **Arthritis**
- **Injury**
- **Pregnancy**

The Lockshank opens with just a fingernail; no other tool is needed. When closed, it stays locked until you choose to remove it.

An audible click when it snaps shut assures that it is properly locked.

The Lockshank is versatile:

- **Multiple rings can be combined on a single Lockshank.**
- **A Lockshank can be worn alone as a wedding band.**
- **A Lockshank can be installed on a ring with different side widths.**
- **A Lockshank can be shaped to an off-round outline.**

Lockshanks are available in 66 sizes, from size 4 to 12, in widths of 2.0 to 10.5 millimeters. All are 1.8mm thick, and are available in 14K and 18K gold and platinum.

The Lockshank:

- Is easy to put on and take off
- Keeps top-heavy rings properly oriented

The Lockshank's simple installation can be accomplished at most jewelry stores. Your jeweler seamlessly joins the Lockshank mechanism to the top third of your existing ring, which then opens fully and fits snugly.

Your jeweler can obtain a Lockshank either from a standard jewelry supply catalog or from De le Vin Designs.

Ask for the Lockshank by name. If your jeweler is not familiar with this relatively new product, tell him or her about it!
